SURGICAL SCREENING & TESTING

Dear		
DEAL		

You have been scheduled for a procedure by your provider today. Before your procedure, you will need to be tested for the COVID-19 virus.

What to do before your scheduled surgery:

- Self-monitor twice a day for two weeks prior to your surgery/procedure using the patient self-monitoring tool
 on the back of this form and practice social distancing. If at any time you develop symptoms of COVID-19,
 contact your provider immediately.
 - Begin self-monitoring on:
- The COVID-19 test must be completed within 48 hours before your surgery date.
 - Date of your COVID-19 test:______

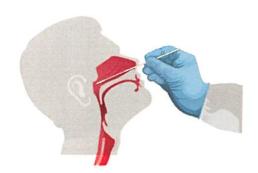

Testing site information:

- Hours: 7:30 a.m. to 12:30 p.m., seven days a week
- <u>Location</u>: Enloe Cohasset Campus
 560 Cohasset Road, Chico, CA, 95926
- Drive into the testing site from Rio Lindo Avenue. Follow the posted signs. (Please see map.)

What to expect:

- An Enloe nurse dressed in personal protective equipment, including a gown, gloves, mask and face shield, will come to your vehicle and verify your name and date of birth before obtaining the test sample.
- We will take your test sample while you are in your vehicle. The procedure is quick, slightly uncomfortable and takes a few seconds.
- Obtaining the specimen may cause an urge to sneeze, so the nurse may ask you to clear your nasal passage before inserting the swab.

Enlos Prompi Core COHASSET RD.

After the test:

- Results will be sent to your provider within 24 hours. Enloe staff will contact you with your results, confirm your surgery date and answer any questions you may have.
- In the event your test is positive, our team will collaborate with Butte County Public Health to support and guide you.
- If your test is negative, it is crucial that you continue to follow the prevention measures of social distancing
 and self-monitoring to prevent getting the virus. Please visit www.buttecounty.net/ph or www.enloe.org for
 information and resources about COVID-19.

If you have questions, please call the provider scheduled to perform your surgery or procedure:

Patient Self-Monitoring Tips for COVID-19 Symptoms

- The purpose of self-monitoring is to identify potential COVID-19 illness early. Early detection can reduce the potential of transmission to family and community members.
- The reason to self-monitor is to monitor your health and all symptoms prior to having your secluded surgery.
- Complete the self-monitoring log below twice a day, for two weeks. Bring completed log with you to a Healthcare Provider visit.
- If symptoms develop, contact your healthcare provider. If your symptoms are severe and/or you are having difficulty breathing, seek immediate medical attention.
- Bring completed log with you to a Healthcare Provider visit.

Mark if you have any of the symptoms: circle 'Y' for Yes and 'N' for No. Do not leave any spaces bank. If you have a fever or any symptoms, immediately call your healthcare provider.

**A fever is any temperature greater than or equal to 100.0°F. If you do not have a thermometer, record if you felt feverish.
